

ARTEMIS ViewPoint™

Introducing A New Perspective On Managing
Projects And Resources

Artemis International Solutions Corporation is proud to introduce ViewPoint™ – a total project and resource collaboration solution designed to improve the productivity of your organization by getting projects done more quickly and intelligently.

Our new Web-based solution ensures accurate planning, budgeting, tracking and communication of project and resource data at every organizational level. Based on input from loyal customers, we've developed this feature-rich solution for all your project- and resource-driven initiatives.

ViewPoint: A Role-Based Solution For Optimal Project And Resource Management

Artemis ViewPoint meets the needs of everyone involved in one or more projects across the enterprise, including:

- program managers
- project managers
- resource managers
- individual resources
- executive management

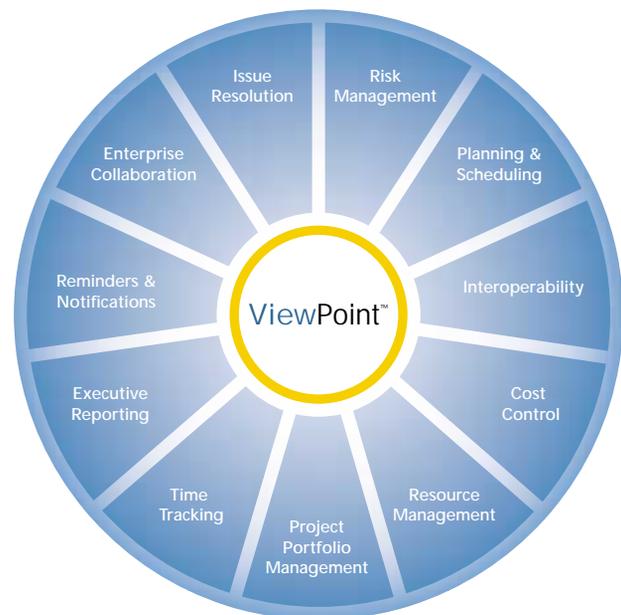

Using advanced multi-project architectures, industry standard databases, and intuitive Windows®- and browser-based management and allocation tools, ViewPoint handles the most complex projects and resource challenges.

ViewPoint Features

ViewPoint offers all the features and functionalities you expect from a leader in project and resource collaboration – and more!

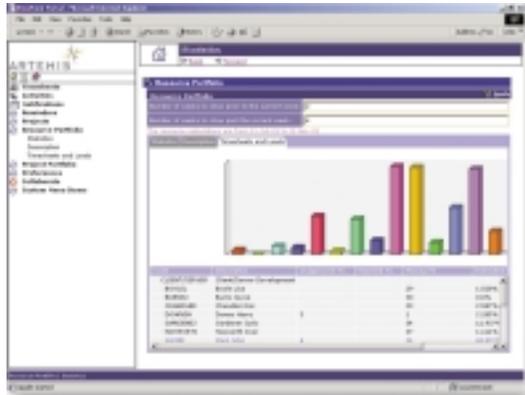

- **Portal approach:** personalized, Web-based homepage that displays role-based information and provides easy access to important data
- **Customized, role-based instant reminders and notifications:** communicate business critical events in real-time
- **Enterprise collaboration:** collaborative technology to share and leverage collective knowledge, unstructured documents and e-mail – including threaded discussions via Web browsers and Web folders

- **Project portfolio management:** analysis and review of cost and schedule information for project portfolios
- **Resource management:** streamline the time, cost and risk of identifying, securing and keeping the resources you need
- **Risk management:** detect and mitigate project risks to any multi-project code structure element, project or activity
- **Issue resolution:** identify issues and develop resolution strategies to any multi-project code structure element, project or activity
- **Executive reporting:** access information from multiple business perspectives, including Gantt charts, for various user roles
- **Timesheet tracking and approval:** implement automated weekly timesheet and task progressing with proven enterprise scalability
- **Planning & scheduling:** plan, control and monitor the progress of all your projects
- **Cost control:** organize your project cost planning, schedule integration and earned value management (EVM) process
- **Interoperability:** integrate seamlessly with existing data repositories

ViewPoint Highlights

- Multi-project visibility and interface metaphors allow you to easily handle portfolio views and analytical information
- Barchart viewer functionality includes traffic light indicators that relate to project/multi-project information
- Ability to attach unstructured data to activities and projects strengthens enterprise-wide collaboration
- Simple navigational scheme with comprehensive, role-based drop-down menus and icons
- Advanced edit/add/delete functionality allows remote users to manage and control changes to their plans and schedules

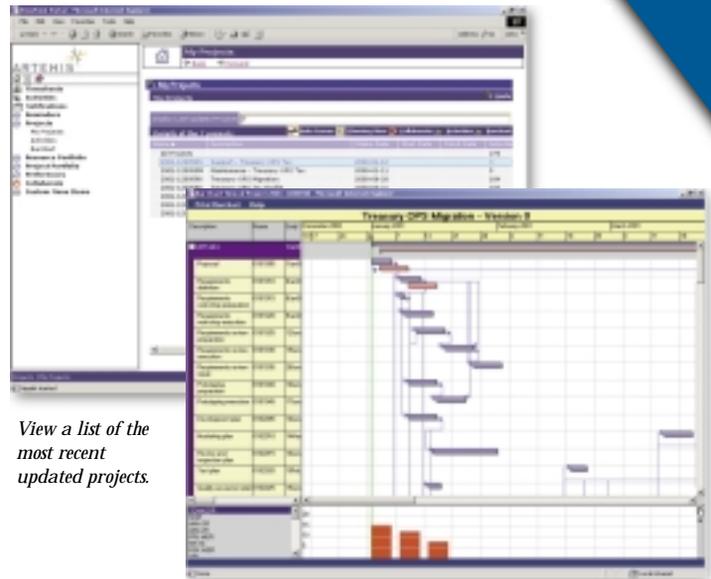

ViewPoint resource management features include displays of all resources associated with all elements of the OBS for which a resource manager is responsible.

A key component of the Artemis Business Management Architecture™, ViewPoint is your answer for maximum control over a variety of business-critical and resource-intensive projects.

ViewPoint Application Areas

Core elements of ViewPoint's IS/IT-specific functionalities include accessibility, usability, a centralized and open database, and executive decision-making support via interactive dashboards. ViewPoint also helps you identify your **new product development** strategy, track all related activities, and support a timely product launch. And ViewPoint supports **capital program management** with yearly-warning indicators and comprehensive reports that provide performance visibility.
